

AeroFlex –1632 NVR

Enterprise-Ready, Intelligent Video Surveillance

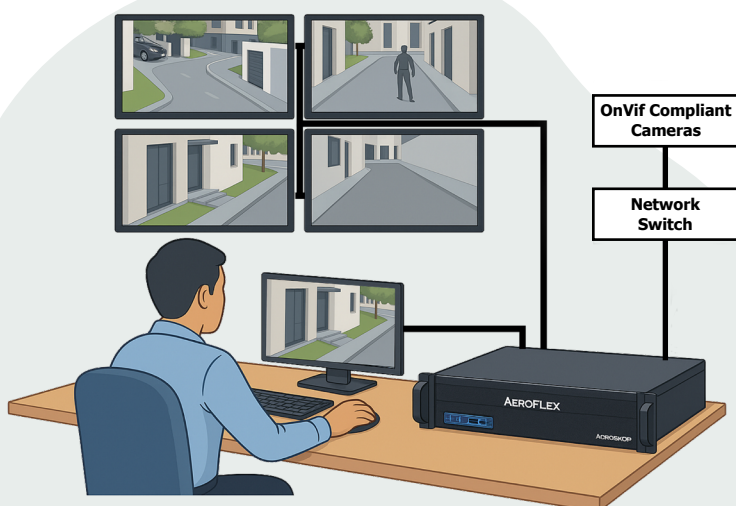

Engineered for Clarity, Performance, and Scalable Security

AeroFlex is a first of its kind Network Video Recorder designed to deliver unmatched flexibility and performance.

With support for over 900 ONVIF compliant camera brands, AeroFlex redefines open platform video management and brings the future of CCTV control into a single, compact appliance.

AeroFlex also eliminates the need for separate control room components. As a single appliance, it can serve as the core of an entire CCTV control room, acting simultaneously as a powerful video management server, recording server, and operator workstation. It can directly drive a 2x2 video wall, significantly reducing the cost and complexity of traditional multi-device setups. By consolidating all core functions into one scalable unit, AeroFlex helps end users save space, reduce hardware expenses, and streamline their surveillance infrastructure.

Whether you're securing a small office or a large enterprise, the AeroFlex NVR delivers scalable video management that evolves with your security needs.

AEROFLEX –1632 NVR

KEY FEATURES

Universal Compatibility	Supports nearly all ONVIF-compliant cameras — over 900 brands — using the preloaded Aeroskop STRAK VMS
GPU-Accelerated, Lag-Free Viewing	Decode and monitor high-resolution streams in real time using GPU acceleration — connect up to 3 monitors ,multi-screen viewing
Scalable Licensing	Start with just the number of channels you need — then add more, one camera at a time, as your needs grow, the system comes pre-installed with a minimum of 16 channels.
Scalable Storage Architecture	Supports up to 9 internal SATA III drives. With high-capacity HDDs now available, AeroFlex can scale beyond 200 TB of raw storage in a single NVR. Additionally, it offers the option to connect external storage devices, enabling further expansion.
Enterprise-Grade Reliability	Runs on Linux OS with advanced OpenZFS (RAID-Z) architecture — ensuring high data integrity, RAID rebuild resilience, and freedom from hardware RAID limitations
All-in-One Powerhouse	AeroFlex is more than just a Network Video Recorder — it's a powerful workstation that lets you view, record, and manage your entire surveillance system from one high-performance, scalable unit. It also functions as a video wall source.
Remote Viewing	Remote clients can easily access the NVR over LAN to view live feeds, playback recordings, and manage video. The STRAK Client Software supports Windows, Linux, macOS, and Android.
Single Appliance For	Video Management, Recording, Monitoring, Playback, Workstation Use, Video Wall / Multiple Displays

TECHNICAL SPECIFICATIONS

Model	AF-1632 – AEROSKOP AEROFLEX NVR
Channel Capacity	Flexible 16–32 Channels, can be Extended upto 50 Channels under certain Conditions.
Video Management	STRAK VMS with 32-camera license, expandable per single camera up to 50 channels
CPU	Intel Core i5, 14th Gen
RAM	16 GB DDR4 (2x8 GB), expandable up to 64 GB
Storage	2 X 500 GB SATA III for VMS & Apps
Storage Bays	9 x 3.5" SATA III HDD bays (also supports 2.5") (HDD Not Included)
HDD Options	Surveillance-grade 4 TB / 8 TB / 12 TB / 20 TB/ 22 TB – SATA III
RAID Support	OpenZFS RAID-Z1 (default), RAID-Z2 ,MIRRORING
Ethernet	5 x Gigabit LAN
Display	Outputs HDMI, VGA,
Graphics	NVIDIA T 400 4GB with 3 HDMI ports
I/O Ports	8 x USB 3.2, Line-In, Line-Out, Mic-In, 2 x Front USB2.0
Expansion Slots	2 x PCIe 16 X, 3 X PCIe 4 X
Form Factor	2U Rackmount, Dimensions: 650mm(D) x 430mm(W) x 89mm(H) (RAIL KIT OPTIONAL)
Power Supply	500W ATX Standard PSU
Physical Dimension	650mm x 430mm x 89mm
Operating System	Ubuntu Linux
